

Helping Vendors Increase Sales Through Leasing

Acceptance
LEASING & FINANCING SERVICE, INC.

At Acceptance Leasing & Financing Service, Inc. we are 100% partner driven. We have a solid reputation of working with vendors in helping their customers attain the most up-to-date equipment while shedding the risks of ownership in a rapidly advancing technological age. A Partnership with Acceptance Leasing enables your company benefit from sales profits immediately, without incurring any overhead expense.

As a vendor offering our leasing services, you can be assured that our business will reflect your company's expectations and help your sales staff turn procrastinators into buyers. We can help tackle your marketing problems and aid your sales staff in closing the transaction.

When you talk pricing to your customer, why not recommend to them the option of leasing their equipment. We'll help expand your customer's financing options to fit your sales strategies. We'll assist your sales staff in overcoming obstacles that might previously have cost you the sale by offering your customer: no money down, low, fixed monthly payments, and quick credit approval. And best of all, most leases can be approved up to \$100,000 with a simple one-page application.

When your customer is presented with a readily available lease, the sale itself is most likely to be completed. Many vendors turn to our services as a means of getting paid quicker. When your customer chooses the leasing option our company runs the appropriate credit analysis. Upon approval, the lease is signed. When the equipment is delivered to the customer our company pays you in full. Since all payments are made to our company there are no cash flow or collection worries for you. And your sales records show the lease as a cash sale.

We give more options by having access to not only local funds but also National Banks. This provides you with better service.

Give your company a competitive edge by partnering with Acceptance Leasing & Financing Service, Inc. and offering affordable equipment finance solutions to your customers. ***Since 1992, we have partnered with vendors to enable vertical growth in an ever-changing marketplace.***
