

What Leasing Can Offer

Leasing through Acceptance Leasing & Financing Service, Inc. is a great way to get that new or used equipment your business as been looking to acquire.

Acceptance

LEASING & FINANCING SERVICE, INC.

Leasing - A Smart Business Decision For Any Size Company

Lowering costs, increasing efficiency, keeping your company competitive, all while maintaining adequate cash reserves, is easier to achieve when you do it in monthly increments. With leasing, you choose the equipment, the end-of-lease options, and most importantly, the one monthly payment tailored to your needs. Our 100% financing, with minimal initial cash outlay, enables you to bundle many of the up-front costs such as delivery, installation and sales tax into one monthly payment tailored to your needs. Multiple equipment purchases can also be combined into one payment. You'll be able to keep up with technology, manage your cash flow better, and probably even save on taxes*. A lease can be tailored to meet your specific needs without having a negative effect on your cash flow, so you can get the equipment you need immediately without having to make a major cash outlay or tie up additional collateral.

We call it "One Solution." And that means one leasing solution that can be customized to fit whatever form you need it to take (which could entail a unique payment plan or end-of-lease option). Call us at Acceptance Leasing & Financing Service, Inc. today and see how "One Solution" will fit your needs and budget.
